

# Tachograph

This 3.5 hour course includes:

- Introduction to the two types of tachographs (analogue and digital)
- Analogue tachographs
- Manual entries
- Mode selection
- Centre field entries
- Responsibilities
- Digital tachographs
- Requirement to use the driver card
- Requirements for calibration, correct slots, to carry sufficient print rolls and to make the information available to employers
- Explanation and description of what must be available to enforcement officers
- Correct use of mode switch
- Procedures for lost or stolen cards
- Universal Time Coordinated
- Manual entries
- Operator responsibilities

- Different cards
- Explanation of pictograms
- Example of how to operate the vehicle unit
- Examples of the range of penalties and fines applicable to tachographs
- Practical exercise. Candidates are shown examples of tachographs with infringements and asked to write down the infringements they find. This is run as a group exercise with each candidate using their own course manual.

The course also includes numerous film presentations, practical exercises and confirmation of learning quizzes.
